

## Committed to improvement

Dr Mark Steven-Howe *BDS DGDP (UK)*

Broadway Dental Care

One of the main driving forces behind Broadway Dental Care is our commitment to continuous improvement of our care to patients and our staff. Nobody improved anything by just talking or writing about it. Improvement happens only when we actually 'do' the job.

To this end Broadway Dental Care is proud to announce that it has been selected as a regional Clinical Training Centre for Warwick University. Our role is to demonstrate to selected final year postgraduate students how we blend the best elements of academic dentistry into practical solutions for patients in a general practice environment.

The truest measure of success in clinical dentistry is the test of time. We have been specially selected because of this blend of long term commitment to care and a broad range of advanced dental treatments in a real general practice environment. This is sometimes hard to demonstrate in a purely academic environment where students, staff and patients come and go. It is also hard to offer patients a complete care package by specialising in only one aspect of dentistry such as implants, root fillings or gum care.

The greatest benefit however is that the students help by challenging and questioning our treatment choices and philosophies thus keeping us open minded and fresh to new ideas.
